Fastening systems for towel rails radiators

The Verona Arena is a Roman amphitheatre in Piazza Bra in Verona, Italy built in the first century. It is one of the best preserved ancient structures of its kind. In ancient times, the arena's capacity was nearly 30,000 people.

Our fixing systems are painted with white epoxy powders and a high degree of brilliance. We are also able to supply them in a series of special colors, to better adapt to the environment in which they are mounted.

Have it your RAL: off the charts!

Upon request, it is possible to have certain items in particular RAL. A surcharge of 40% on the standard price is required for these items. Minimum net order € 500,00. In case of orders below the minimum, an extra € 100,00 must be added. These items are excluded from returns.

The recent German directive **VDI 6036** is changing the way of thinking of installers, engineers and architects on safety in fixing radiators. Depending on the application and positioning of the radiator, the directive defines precise limits on the forces to be supported and the maximum permissible displacements. Higher standards are required in public places such as banks, stadiums, schools, hospitals. **TÜV SÜD** has tested compliance with the **class 3** specifications of the directive, of a series of MB FIX brackets for all types of radiator and application, in order to guarantee our customers, the safety of fixing in all situations. For all our customers we provide our machines to test the correct application of **VDI 6036**.

High-quality products by MB FIX are only for professionals from the trade. When choosing MB FIX to partner with, you can rely on perfect technology and receive a guarantee for safe and correct installation, as well as long-lasting products. Should there be any defects, you can of course, rely on the responsibility of MB FIX. You can for sure also count on MB FIX's spare parts service: Accessories and spare parts are available for many years thanks to long-term product ranges.

WE THINK THAT EVERY PROBLEM CAN BE SOLVED
WITH A TOUCH OF CREATIVITY
